Asterisk Knee Brace is proud to announce the **ALL-NEW Carbon Cell 1 (CC1)**. Our dedication to making the finest quality, fitting and performing knee braces in the world has led us to the design and development of the CC1. The CC1 is manufactured from Military Spec and Aerospace grade carbon fiber prepreg that is made in America, the finest in the world. Our focus during the design and development of the CC1 was making the slimmest, lightest, most comfortable knee brace in the world. We wanted a brace that fit so well on your leg, it looks like it's painted on, and we hit a home run!

ULTRA CELL 3.0

Introducing the new **Ultra Cell 3.0™**. With continued ultimate support as in the current Ultra Cell, we have trimmed down the profile of the liners and made getting in and out of the brace very easy with 4 snap-in strap liner attachments, also allowing independent adjustment for the best comfort and support. Although many of our customers have been extremely satisfied with the Ultra Cell with the BOA system, we felt it necessary to have a lower profile model with a quick release system available as an option.

ULTRA CELL 3.0 FEATURES

- A.R.C. CUFF**
 - Adjustable Retention Control
 - Multiform rigid lateral support
 - Built in Anti-Rotation connection
 - Stainless steel retention strips
 - Inverted adjustment increases lateral rigidity
 - Thermo-Formed EV50 shock absorbent foam padding
- TELE-TRI PATELLA CUP**
 - Telescoping Three piece design
 - Easily removable
 - High impact Nylon 6 material
 - Full range of motion coverage of the knee cap
 - Thermo-Formed EV50 shock absorbent foam padding
- A.C.M. FRAME**
 - Anatomically correct design
 - Carbon fiber epoxy matrix
 - Rigid & lightweight, impact distributing structure
- ASYMMETRI-GLIDE HINGE**
 - Tracks the natural "rolling-gliding" motion of the knee joint
 - Asymmetrical design allows each hinge to set properly
 - Allows for automatic tibia alignment of lower frame
 - Adjustable ext. regulator from 0° to 30°
 - Condyle shims for fine tuning fit
- ANTI-ROTATION TETHER**
 - Links the brace to the boot, making them as one
 - Transfers forces of a lower leg rotation
 - Adjustable to suit each individual
- THERMO-FORMED PADDING**
 - Thermo-Formed for precise fit
 - Forms to leg shape using your body heat
 - Easy cleaning
- WATER RESISTANT**

CELL

The **Cell™** Knee Protection System is built on more than 10+ years of time-tested and proven designs. Several patented revolutionary design concepts come together in unison to create this System: the A.R.C. Cuff has the ability to be totally adjustable for fit, yet remain rigid; simple, low profile strapping system; a natural free-motion, rolling-gliding hinge follows the natural movement of the knee; carbon fiber matrix, tibial plateau-capturing frame design provides strong, yet lightweight protection; brace-to-boot tether attachment helps prevent lower leg rotation; plus the full-time, full-coverage patella cup offers superior coverage.

MICRO CELL

We would like to introduce for 2019 the new **Micro Cell™**. The Micro Cell is designed specifically for the younger rider, approximately 5-10 years old, depending on size and weight. This is also the first of our "Slim Line" of carbon knee braces. The Micro Cell™ has an epoxy prepreg carbon frame, made in our factory in Corona, California, with a full coverage patella cup and hyperextension stops ranging from 0-30 degrees (similar to our current Jr Cell). It is also equipped with our true motion hinge. This brace offers rigid lateral arms for the best support and lowest profile. The Micro Cell™ assures all the important areas of knee protection are addressed which most other braces do not offer.

MICRO CELL FEATURES

- ❖ **CARBON FIBER FRAME**
 - Anatomically correct design
 - 12K aerospace carbon fiber
 - Ultra lightweight, impact distributing structure
- ❖ **TELE-TRI PATELLA CUP**

« PERFORMANCE KNEE BRACE PANT »

After much research and seeing a rising need for this type of product, we decided to design something functionally better in a knee brace product for athletes. Previously, available products consisted of knee brace sleeves and one-piece sock/sleeve combinations. Each of these offers support but would greatly benefit from some additional modifications to be thoroughly effective.

Knee brace sleeves are satisfactory for acting as a barrier between the brace and the skin, but with very little other aid. In addition, the sock/sleeve combinations simplify the product but oftentimes causes the brace to slip based on the sock design.

Our brand new Zero G Performance Knee Brace Pant was born out of a need and solution for those who require this product in their sport. The pant envelops the knee brace, which allows it to keep the brace in place utilizing compression from the hips. The over-sleeve in the pant seals the brace into the pocket with a Velcro® enclosure located at thigh area. It also compresses any brace portions that may typically get caught on a moto pant. It makes it simpler to slide the pants over the knee brace as well as allowing the brace to move without restraint under the pants, while athletes are training. Additionally, the pant features a Cordura® Built-in Gear Guard and Anti-Rotation Tether Slots.
