2020 CATALOGUE

CHARGE

TAKE THE FIRST STEP NOW

- 1** Recovers a sulphated battery
- 2** Tests the battery condition
- 3** Bulk charge
- 4** Peak charge with minimal fluid loss
- 5** Tests whether the battery retains the energy
- 6** Reconditioning of a drained battery
- 7** Maintenance for maximum performance
- 8** Maintenance for maximum battery life

THE SMARTEST BATTERY CHARGERS IN THE WORLD

As well as charging batteries, all CTEK chargers have "pulse" maintenance mode. Leave them connected to batteries of stored vehicles for months and they will safely hold the charge level to extend battery life and eliminate starting problems next time your customer wants to take his "toy" out.

How green are you? Not only do you save dollars with CTEK, your saving the planet!
Every unserviceable battery you dispose of contributes to the earth's pollution.
Reduce this waste by extending battery service life with CTEK.

CODE	ACCESSORIES	RRP
7101612	QUICK CONNECT SOCKET 56-260 6MM	\$14.95
7101826	QUICK CONNECT SOCKET (56-382) 8MM	\$26.95

A 6 Volt charger. Just what enthusiasts need for vintage British machines and early model Japanese trail bikes.

XC800 FOR BIKES AND VINTAGE CARS WITH 6V SYSTEM

7101558 RRP \$119.95

The XS 0.8 is perfect to keep motorcycle, ATV quad and PWC batteries charged. Like all CTEK models it is safe to leave connected 24/7. Capable of charging most car batteries. When full charge is reached the XS 0.8 will switch back to maintenance mode which gives just enough charge to hold the optimum level. With an RRP well under the price of many motorcycle, Jet Ski and ATV batteries it can pay for itself when it saves just one battery.

XS 0.8 FOR BIKES, ATV's, JETSKIS, BOATS AND CARS WITH 12V SYSTEM

7102094 RRP \$89.95

Ctek MXS 3.8 12v 3.8amp battery charger. Suitable for small to medium batteries. The Ctek 3.8 is capable of charging batteries between 1.2 and 80 amp hours. It features a 7 step charge pattern as well as cold weather and motorbike modes. The Ctek MXS 3.8 is suitable for all lead acid batteries including AGM and Deep Cycle. The Ctek 3.8 comes with a 5 year warranty.

MXS 3.8 FOR BIKES, ATV's, JETSKIS, BOATS AND CARS WITH 12V SYSTEM. Extra power to fast charge batteries quickly even when used in cold climates.

7102824 RRP \$149.95

MXS 5.0T

FOR BIKES, ATV's, JETSKIS, BOATS AND CARS WITH 12V SYSTEM.

Temperature compensation built in!

The **MXS 5.0T** is an advanced microprocessor controlled battery charger with automatic temperature compensation built in providing unrivalled performance on batteries from 1.2Ah up to 110Ah. The MXS5.0 solves a broad range of battery problems and is the ideal charger for the user with high demands. Features of the MXS 5.0T include diagnosis of battery condition to establish if it can receive and retain charge, patented automatic desulphation programme and a special reconditioning function that will revive and restore deeply discharged and stratified batteries. AGM mode is perfect for maximising performance and life of most Stop-Start batteries. The built in temperature compensation ensures ideal charging performance even in the most extreme conditions. Patented Float/Pulse maintenance makes the MXS 5.0 ideal for long-term maintenance.

7102823 **RRP \$179.95**

MXS 7.0

12V FOR BIKES, ATV's, JETSKIS, BOATS, CARS, 4WD's AND RV's.

8 step operation. Extra functions include 12V power supply mode which allows the battery to be disconnected from the vehicle without losing important configurations.

The **XS7000** is suitable for larger batteries over 14 Amp Hour only. In "Supply" mode the output voltage cuts back to 13.6 volt with a current life to "dead" batteries and this alone can save more than the purchase price of the charger.

7102884 **RRP \$269.95**

MXS10

12V FOR TRACTORS, BOATS, CARS, 4WD's AND RV's.

8 step operation. Extra functions include 12V power supply mode which allows the battery to be disconnected from the vehicle without losing important configurations. A high output charger popular choice for fast charging large batteries in caravans, RV's and boats as well as general automotive and farm applications.

The **MXS10** is suitable for larger batteries over 20 Amp Hour only. While it is not suitable for use on most motorcycle and ATV's it is popular for quick charging of larger batteries fitted to tractors, cars, trucks and boats.

7102096 **RRP \$369.95**

Some common features on all CTEK chargers not so common on other battery chargers.

Any CTEK charger is capable of charging all battery types.

These include Wet/Flooded, Maintenance Free, Calcium-Calcium, Gel, Absorbed Glass Mat (AGM).

CTEK's Smart charge will not damage vehicle electronics means you can charge without the need to disconnect the battery from the vehicle.

Spark free, short circuit-proof and reverse polarity protected means safe and "Fool" proof.

Input voltage sensor means all CTEK chargers, by automatically adjusting their output voltage, can charge drained and desulphated batteries even if the mains voltage drops as low as 170 volts.

Strong, robust, water-resistant housing means CTEK chargers can be safely used outdoors.

All CTEK chargers are supplied with a dedicated charger socket which can be connected to the battery and mounted on the machine to give convenient connection point for the charger. The sockets can be purchased separately if needed for additional machines. (Stock code 7101612)

All CTEK models will detect voltage of a battery. Leave them connected 24/7 for months. They charge the battery to full voltage then automatically cut off at that point. Maintenance mode resumes as required when charge level drops back.

CTEK backs its products with a 5 year guarantee.

Please read the instruction manual supplied with the charger before connecting it to the vehicle.
