

EBC[®] BRAKES

2019 PRICE LIST

***THE WORLD'S LARGEST RANGE OF PREMIUM
REPLACEMENT MOTORCYCLE BRAKES***

BRAKE PADS, DISCS, BRAIDED STAINLESS BRAKE LINES, CLUTCHES AND MUCH MORE...
WITH FOUR MANUFACTURING PLANTS UK AND USA PRODUCING OVER 10 MILLION COMPONENTS EACH YEAR!

About EBC Brakes

With a worldwide work force of over 400 people, EBC Brakes is an independently owned and managed leader in the brake market, proud of its customers, its products, its success and its people. EBC Brakes produce the largest range of brake pads and brake discs in the world, with over 5000 part numbers for every type of moving vehicle. EBC Brakes are made in one of its two specialist factories in the UK and USA. The majority of EBC brake discs or brake rotors are also made in the UK.

With modern trends towards cheap imported brake pads and brake rotors, EBC Brakes leads the world in its technology, quality control, product performance and customer service. Our product range includes brake pads for cars, trucks and SUV, brake rotors (brake discs) for every rolling vehicle on the planet and even brake pads for wind farms, brake pads for military applications such as the Humvee, various armoured cars and even tanks, railway brake products and all kinds of industrial vehicle brakes.

Types of brake pads manufactured include aramid brake pads, sintered brakes, ceramic brake pads and carbon long life brake pads. The EBC Brake rotor brake disc range includes cast iron brake rotors or brake discs for automobiles, stainless steel brake rotors for motorcycles, mountain bike brake pads and mountain bike brake rotors and ATV brake pads and rotors.

Over the years the brake market has seen many changes and many brands come and go. We have also seen many so called “Famous Names” resort to Branding products and having them made by licensees in emerging market locations. EBC has strongly pursued its philosophy that brake pads and rotors are safety products, and are best hand crafted to maximum focus on high quality rather than price savings and are designed and researched on an on-going basis in our own facilities rather than turning a high safety product into a commodity marketed price point product. We firmly believe that saving a few pennies on brake pads and brake rotors is false economy.

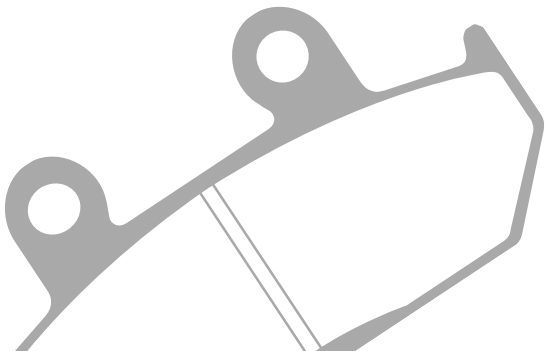

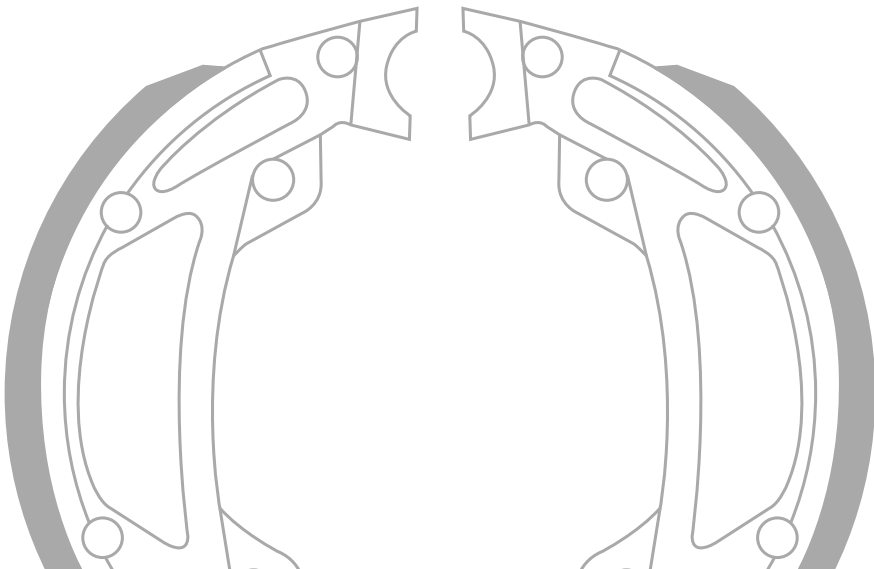

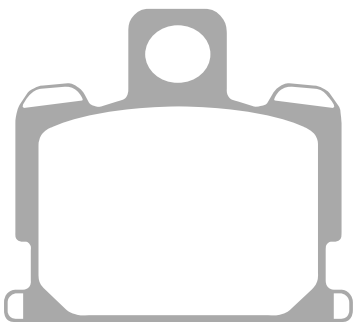

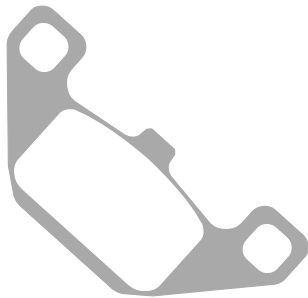

EBC Brakes remains therefore committed to its exclusive UK and USA manufacturing.

EBC has no less than 8 dynamometer systems in its two factories representing over \$3 million investment in research along and with its 60 year pedigree of brake material blending you can be sure that brake pads bearing the EBC name will deliver and perform. Environment is equally important to EBC and brake pads made in our factories have every possible consideration for environmental protection.

When it comes to Brakes there is one name that stands head and shoulders above the rest.

Aramid Fiber Organic FA Series Pads

FA Series organic brake pads will deliver fingertip stopping power and superb brake feel and control, the preferred choice for many sportbike riders. This compound has low disc attack characteristics and gives medium lifetime.

'TT' Pads

'TT' Series - cool running based pad compound for sport use in Moto-X and ATV applications. For mud, sand and wet conditions requiring longer life, use our sintered MXS range below.

Double-H™ Pads

FA Series with HH suffix, EBC's American-made ultra high friction Double-H™ sintered copper alloy brake pads for maximum stopping power and lifetime. With stainless steel radiator plates to reduce heat transfer and double compact for wider pads.

MXS Series Pads

'MXS' Moto-X race pads, ultra high friction American-made sintered copper alloy with diamond ground surface finish for fast brake-in. With external hex drive slider pins, these pads are suitable for all fast Moto-X riding.

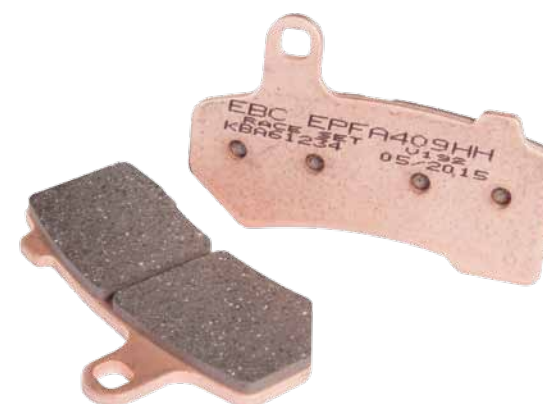

'R' Series Pads

'R' Series American-made sintered copper alloy ATV and Moto-X replacement pads for sport and utility off road riding.

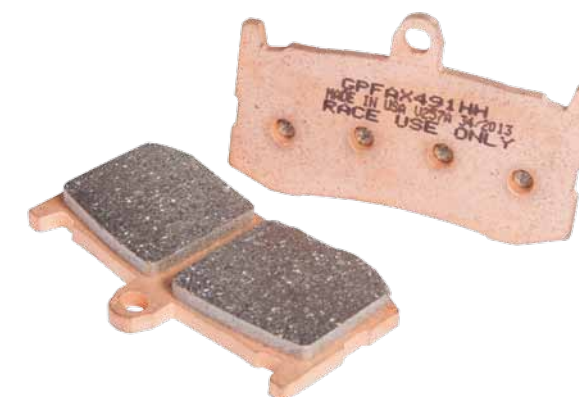

Semi-Sintered V-Pad™

This semi-sintered brake pad combines the highest qualities of an organic brake pad with the endurance of a sintered equivalent brake pad. Designed for the heavy cruiser/streetbike market as a replacement brake pad. Can replace both sintered and organic pads.

EPFA Trackday Pads

EPFA Trackday pads give long life in street use with improved fade resistance and heat cycling plus improved noise characteristics, making this a great pad for heavy streetbikes and cruisers as well as faster superbikes. Great for intermittent track use.

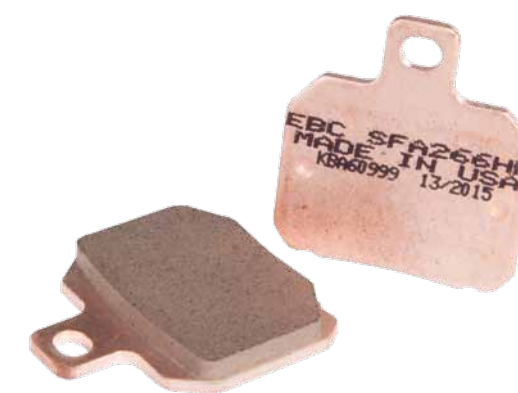

GPFX Race Series Pads

GPAX pads are an ultra high friction RACE ONLY pad, not designed for street use due to their high friction level.

SFA Organic Scooter Pads

A superb general replacement pad for urban use on scooter mopeds, mopeds and mopeds. Made using aramid fibres, these pads give above average lifetime, reduced disc wear characteristics and offer great value for money.

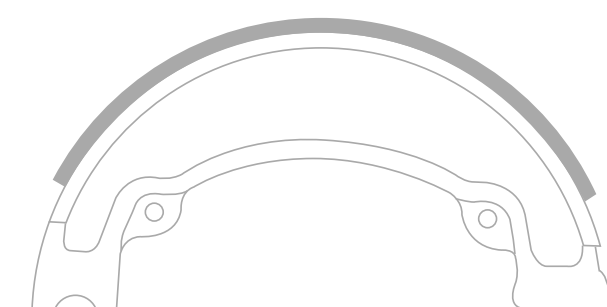

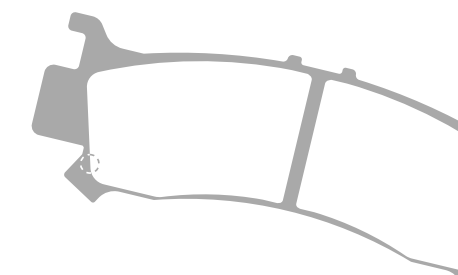

SFA-HH Sintered Scooter Pads

These American-made sintered scooter pads are long lasting with high performance HH rated stopping power for perfect braking- wet or dry. The HH pads target the faster and heavier scooter market and work well with stainless steel brake discs.

SFAC Carbon Scooter Pads

A high durability carbon organic compound giving higher pad performance and longer life for the mid to heavy scooter range. UK-made using 30% copper powder by weight with carbon granules.

EBC BRAKE SHOES

All shoes are radius ground and edge trimmed to fit precisely in your brake drum and also feature lead in and lead out chamfers at lining ends and original equipment style brake shoe springs.

EBC Plain brake shoes

EBC Brakes™ plain brake shoes are made using high-pressure die cast aluminium platforms with bonded brake linings.

EBC plain motorcycle brake shoes are radius ground, edge trimmed and also feature lead in & lead out chamfers at lining ends and original equipment style brake shoe springs.

They are a perfect replacement for OE brake shoes as they are radius ground to fit exactly into the brake drum and are simple to fit using the OE style brake shoe springs included.

EBC Water Grooved Brake Shoes

EBC WATER GROOVED series brake shoes are made using either high pressure die cast aluminium platforms for most two wheel machines and ATV's or pressed steel platforms for most ATV's with bonded brake linings.

The multiple angled liner grooves are designed to channel away dirt, dust, water and debris from the braking area to improve braking and extend shoe and drum life.

In early years mechanics would "Saw" these grooves into liners which we do not recommend even though ZERO EBC brake shoes contain any dangerous fibres.

EBC Plain Brake Shoes

EBC Water Grooved Brake Shoes

BRAKE SHOE DIAMETER CHART
(in mm)

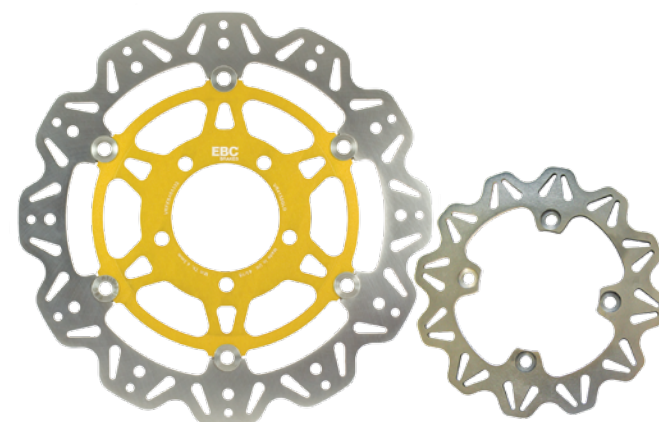

X and XC Series Sportbike Discs

X and XC Series Discs feature mill hard stainless steel high friction rotor blades for maximum brake effect and are direct size for size replacements for OEM discs. These lightweight discs feature our patented SD system square drive button system.

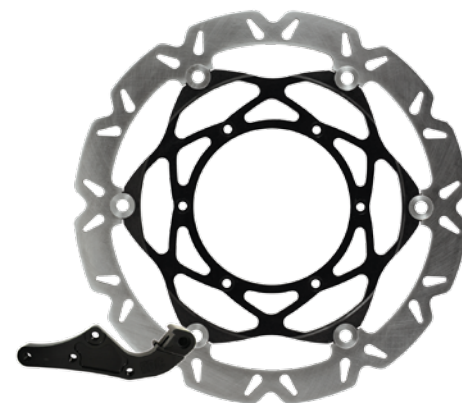

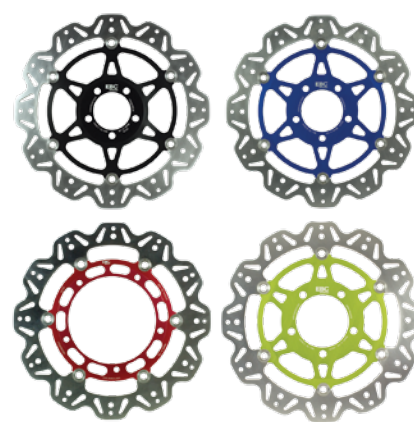

VMD Classic Style Discs

These lightweight, black anodised vintage discs are new to our range. The vintage fitment benefits from billet aluminium construction; lightweight, less unsprung weight enables better handling and stopping power. Perfect for the Café racer scene.

Sportbike VR Series Discs

Vee profile lightweight discs with alloy hubs and ground stainless steel disc blades for fast street bikes. Choose from black or coloured hub options as shown above.

Supermoto Brake Disc

Contoured SMX disc with vee design. 320mm disc upgrade kits complete with relocation bracket.

Custom Finish VR Series Discs

Special Edition splatter anodised custom finish is applied to the centre hubs of our VR Series discs by hand. The coating has the same resilience as other EBC disc finishes but with a radical and unique aesthetic.

MD Series Stainless Scooter Discs

Made from mill hard rolled steel, these discs are machined to match the original units, mechanically de-stressed to avoid disc distortion. Surface finished for precise smoothness and then zinc coated to prevent corrosion or rusting.

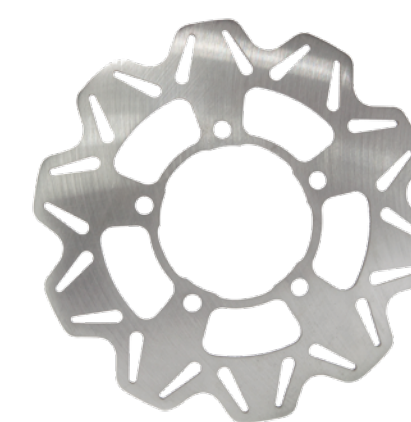

VR Series Stainless Scooter Discs

Made in the UK using German mill rolled heat treated and precision ground stainless steel. The New VR Series stainless profiled scooter sport discs are the lightest and best looking on the market and can be used with any type of brake pad.

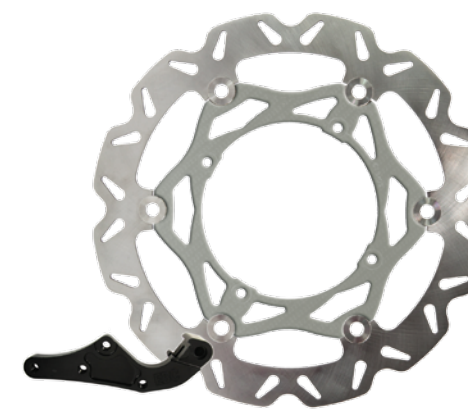

UTVX Discs for ATV/Quad/4x4

These self cleaning discs look great and give an improved brake performance. Made in our British manufacturing facility using durable, tough German mill rolled stainless steel, heat treated and diamond ground to give great braking for less than OEM prices.

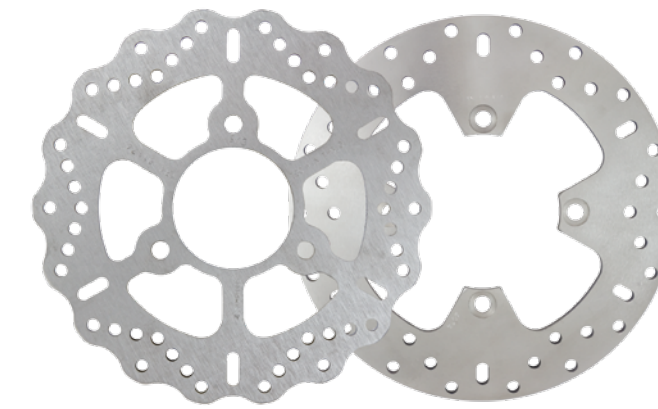

CX Extreme Off-Road Discs

CX Extreme self-cleaning lightweight stainless discs are a size-for-size replacement/upgrade for front and rear fitment on all modern motocross machines.

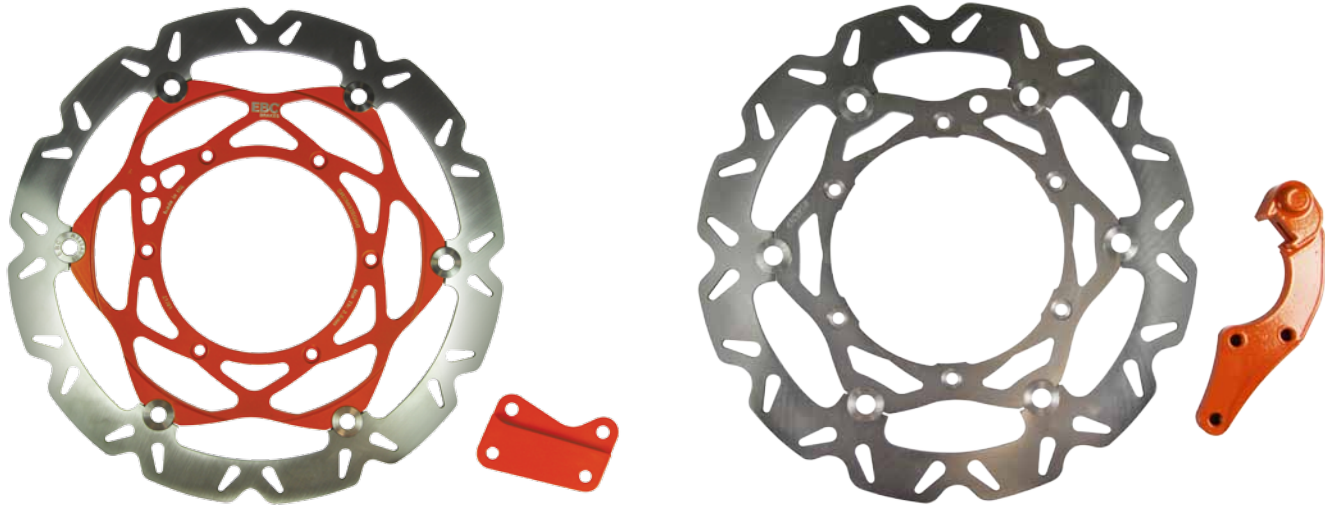

Oversize MX Discs

250mm or 280mm Motocross oversize disc kit complete with billet aluminium relocation brackets for improved brake power and control with vee design disc.

Rear Brake Discs

Made from stainless steel and available in full circle or contoured profile, suitable for performance street use or racing with new lightweight hole pattern construction.

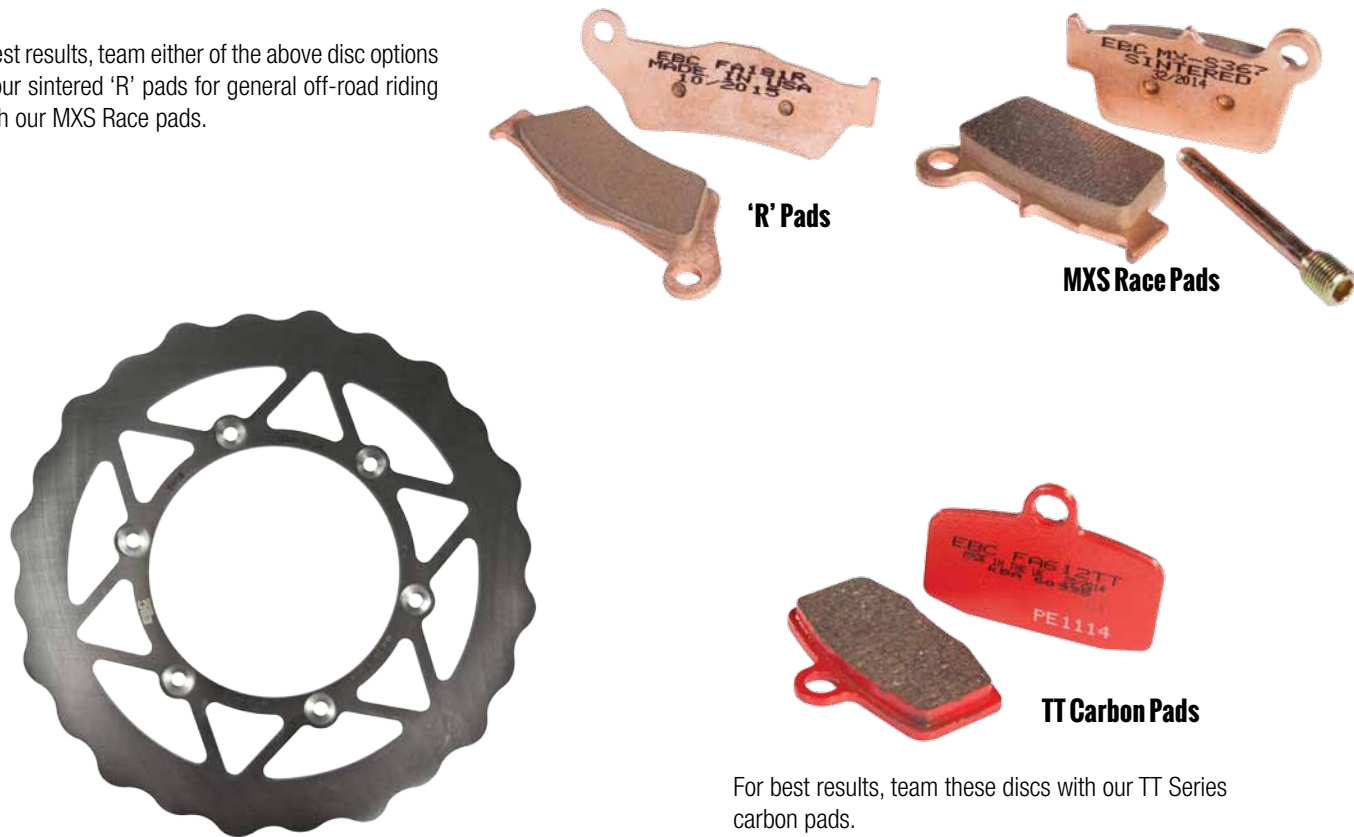

SMX Discs for KTM Models

SMX Colour matched front discs with vee design for KTM are available in lightweight self cleaning profiles to match bike's original parts. Complete with relocation bracket.

For best results, team either of the above disc options with our sintered 'R' pads for general off-road riding or with our MXS Race pads.

OSX Discs for KTM Models

OSX front discs for KTM are available in lightweight self cleaning profiles to match bike's original parts. Complete with relocation bracket.

Discs for Enduro Use

Made in the UK from tough German mill rolled, heat treated stainless steel. These discs have no vent holes in the pad sweep area which improves pad and disc wear in enduro racing. The lack of vent holes prevents mud and slurry being dragged between the pad and disc which can accelerate disc wear and reduce brake effect.

The Steel used in the production of these discs is made using a combination of chrome and carbon. Chrome prevents the formation of rust while the carbon allows the heat treatment which gives ductility as well as strength which helps to avoid heat cracking common with other brake discs made from conventional steels.

CK/CKF Series Clutch Kits

CK complete engine sets of stack height controlled friction plates feature the EBC Brakes' unique alloy particle impregnated clutch facings that prevent burn up or slippage. CKF carbon fiber impregnated kits for ATV and Moto-X use are built to last longer, grip and feel better than cork kits.

DRC/DRCF Series Clutch Kits

DRC is the ultimate clutch rebuild kit for your ATV and Moto-X machine. The DRCF Kit swaps the stock type cork friction plates for a set of severe duty carbon fiber lined friction plates for better heat and wear abilities.

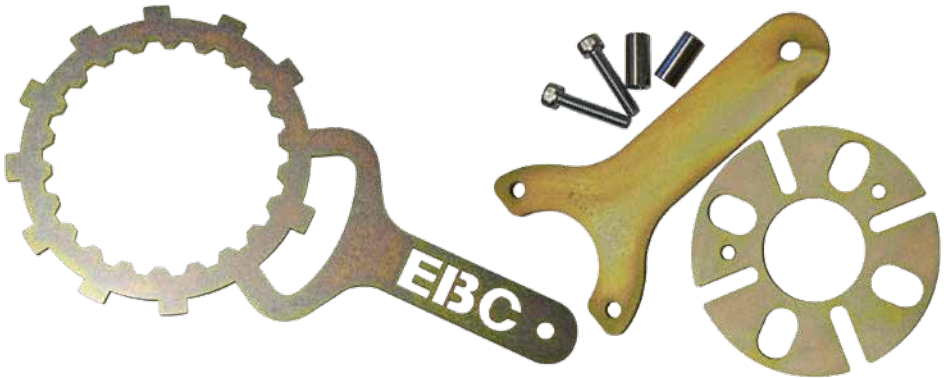

SRC/SRK Series Clutch Kits

SRC is an aramid fiber lined plate set with heavy duty clutch springs (diaphragm type springs included where required). Ideal for heavy sport bikes, faster riders and production based race use. SRK Series includes a full engine set of aramid lined friction plates with clutch springs and steel separator plates.

CSK Coil & Diaphragm Clutch Kits

CSK Sets include either coiled springs or diaphragm springs where appropriate. Coil springs are spiral wound with 4 to 8 pieces per set, made from heat treated high carbon steel delivering the right tension for your bike. Diaphragm springs are dish shaped flat steel pressure rings.

Clutch Removal Tools

Made in the UK by EBC Brakes, these laser cut clutch tools make clutch removal, loosening of the drive shaft bolts and re-tightening a breeze, without any fear of damage to your expensive clutch basket. Tools can be extended to create more leverage if required with any simple workshop tool or tube. EBC Brakes produce a clutch tool for almost every clutch plate design known.

- ✓ 100% British made product
- ✓ Every individual line pressure tested after assembly
- ✓ Improves brake feel and modulation
- ✓ UK Factory built (not “workshop made” from components)
- ✓ Lifetime guarantee against faults, defects and failures
- ✓ Identical routing as originals lines

EBC High Performance Brake Line Kits

EBC Brakes’ range of UK manufactured high performance braided steel brake lines are 100% pressure tested, guaranteed to be leak free and give a firmer, more responsive feel compared to rubber lines.

All of our brake lines not only meet our own stringent standards but they are also approved by TÜV, DOT, ADR and ISO.

All of our brake line kits are a direct replacement of the original manufacturers lines therefore they fit first time, every time – no need for adjusting angles or using universal fittings that do not fit.

Part #	Brake Line Kits	RRP
