WORLDWIDE BRAND & VISION

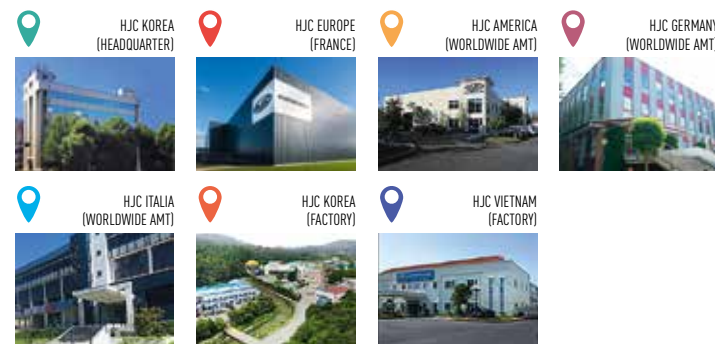

Our Factories are dedicated to the highest quality

HJC has 2 factories based in South Korea and Vietnam which produce more than one million helmets per year. Your helmet is hand-made by very skilled workers with over 40 steps in that process. The perfect logistics guarantees a reasonable price. The quality control ensures your satisfaction.

The largest sales distribution networks Worldwide

A good distribution organization and suited warehouses enable HJC to deliver more than one million helmets around the world. In the USA and Europe, hundreds of thousands of helmets, accessories, and spare parts are stored ensuring an outstanding delivery and after-sales service.

HJC EUROPE

SHOWROOM

ADVANCED, CREATIVE, COMPETITIVE

In order to create the world's best product and strongest brand image, we pursue product development that puts consumer's safety first, develops next-generation materials and creates innovative functions that go beyond the convenience of consumers.

By integrating the metal industry with electronic technology and innovative techniques, we are able to make the world's best, lightweight helmet with the combination of strong and light materials.

From motorbike helmets to winter sport helmets (ski, skeleton, bobsled, etc.) and everyday sports helmets (bike, rollerblade, skate, etc.) we are evolving into the world's leading brand of sports helmets for consumer safety.

RPHA SERIES

Performance REINVENTED

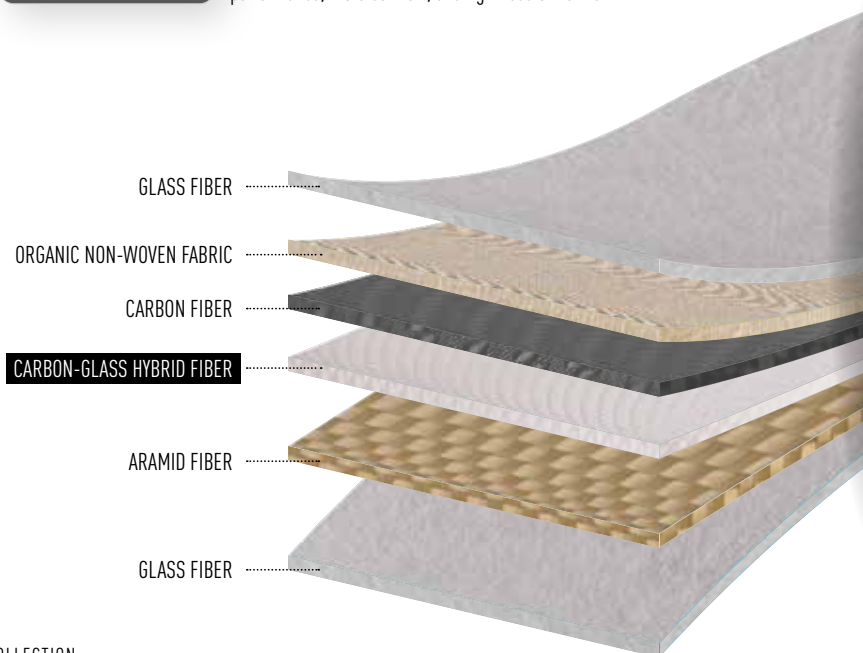

The RPHA Series, which includes the RPHA 11, RPHA 90S and RPHA 70, delivers on the promise of class-leading light weight through cutting-edge technologies that lead the helmet industry. All three helmets feature HJC's Premium Integrated Matrix (PIM) Plus construction, which incorporates four different materials : Carbon fiber, Aramid, Fiberglass and Organic non-woven fabric (ultra-highmolecular polyethylene) to create a unique woven blend that is both remarkably strong and lighter than conventional helmet materials, PIM Plus construction results in a shell weight that is significantly lighter than competing designs for greater comfort.

To create those modern, complex shell designs, HJC employed CAD design and rapid-prototyping technology, along with extensive testing of multiple prototypes within HJC's state-of-the-art wind tunnel. The net result is carefully controlled aerodynamic airflow around the helmet for a smooth and quiet riding experience along with superior, well-controlled flow-through ventilation for additional rider comfort.

P.I.M. PLUS

Reinforcement materials, including Carbon and Carbon-Glass Hybrid fabric, provide enhanced Shock-Resistant performance, more comfort, and lightness of helmet.

SMART HJC

BETTER THAN NOW

Riders are not satisfied just by riding. If you can see the nature of the ride, everything will be more fun. HJC thought it was important to think about how to combine technology with bike culture, rather than just a product full of technology. **That's why SMART HJC was born.**

We reflected these ideas in SMART HJC. True riding pleasure comes from enjoying freedom and meeting new things. Through your own smart wings, run together, share your best moments, and communicate without barriers.

SMART HJC, the choice of rider for fun and convenient riding.

EASY TO USE SMART HJC MOBILE APP

The smart phone app allows you to quickly and easily control various functions of the SMART HJC communication system and also review the Quick Start Guide.

SHIELD CARE & CLEANING

HJC DOES NOT RECOMMEND CLEANING ANY SHIELD WITH SPRAY ON TYPE CHEMICAL CLEANERS.

A reaction between shield and cleaning chemical is possible, resulting in haze build-up and distortion. HJC recommends washing the shield with warm water and soft cloth only.

We also recommend cleaning the shield as soon as possible after dirt and debris have accumulated. Do not let debris sit on the shield for any extended period of time.

If debris has accumulated over time, it is recommended to clean the shield in several applications. This allows the debris to break down with every application.

Excessive rubbing can lead to scratching as the hard debris can act as a scuffing agent. The same can occur if low grade rigid paper towels are used.
